CAREER OBJECTIVE

Dynamic and results-driven professional with expertise in full-stack development, software engineering, and proficient in data structures and algorithms. I am eager to immerse myself in the business aspects of application development while continuously expanding my knowledge in emerging technologies such as AI and Web 3.

WORKING EXPERIENCE

JourneyHub | Remote

Full Stack Developer | 04/24 - present | Remote

- Independently developed the initial product for an early-stage startup, managing both backend and frontend development.
- Led the integration of various travel-related APIs, ensuring seamless functionality.
- Built Hotel, Flight and Activity Booking engine by leveraging data from external API's.
- Actively contributed to product strategy and enhancement through detailed analysis and integration planning.

Freelance | Remote

Web3 Frontend Developer | May 2024 - May 2024

- Contributed as a Frontend Developer for a dApp, playing a pivotal role in creating the product's frontend.
- Developed a seamless single-page application and successfully integrated a feature allowing users to connect their wallets.
- Focused on leveraging Web3 technologies to align with the company's innovative objectives.

PROJECTS

Summr-ai | (Saas)

- Developed a SaaS platform using the T3 stack and tRPC, enabling users to manage GitHub projects by integrating Octokit for commit polling and Gemini API for summarization.
- Implemented AI-driven summarization for repository files and folders, with vector embeddings stored in PostgreSQL for advanced query resolution.
- Integrated Assembly API for accurate audio meeting summaries and chapter generation.
- Built a credit-based payment system with Stripe for scalable monetization.
- Delivered a robust, AI-powered solution showcasing expertise in full-stack development and cutting-edge technologies.

OpenUp | (Blog Website)
- Developed an engaging user experience with seamless infinite scrolling, intuitive pagination, and smooth content transitions, enabling users to effortlessly share and explore unlimited content.

- Optimized backend performance and database communication, resulting in 30% faster load times and a highly responsive platform, enhancing overall user satisfaction.
- Delivered a scalable, user-centric platform that supports a growing community, fostering open discussions and idea-sharing with a focus on usability and accessibility.

Mini-Projects – HarmonyHub, Qid-clone, TokenLauncher, Portfolio, PaytmClone,

---

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, C++, Python
- **Full Stack Development:** Node.js, Express, Cloudflare Workers, Hono, Next.js, React.js, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB, Prisma ORM
- **Tools:** Docker, AWS, Turborepo, VSCode, Vercel, Git, Postman, GitHub, Socket.io, Recoil
- **Relevant Coursework:** Data Structures and Algorithms, Computer Networking, Artificial Intelligence (Basic), Web 3.0 .

EDUCATION

- **Sant Longowal Institute of Engineering and Technology** | 2020-2024
- **Divine Providence College of Science and Technology** | 12th HSC Board

---

PROFESSIONAL CERTIFICATES

- **Tata Consultancy Services** | TCS iON Career Edge - Young Professional. | 2023
- **100xDevs |** 0-1 MERN Full stack web development course. | 2024
- **Scaler Topics |** Python course - Mastering the essentials. | 2023

EXTRA CURRICULAR ACTIVITIES AND ACHIEVEMENTS

- **Team Leader, AGRICT' S (Dummy Company Competition).**
→   Delivered an effective elevator pitch for Agrict's and Developed strategies, collaborated with team members.

- Awarded Golden Badge in C++ on HackerRank.
- Accomplished problem-solving expertise by successfully solving 300+ DSA problems across diverse platforms, demonstrating strong analytical and coding skills.
